The purpose of the Regulatory Pharmaceutical Fellowship is to train selected candidates in one of three tracks focused on the medical and regulatory aspects of drug information dissemination, advertising & promotion, and medication safety. The program serves to maintain and enhance a scientific link among the Food and Drug Administration (FDA), academia, and the pharmaceutical industry. The program also provides an opportunity for the fellow to develop an understanding of the processes of the FDA and the pharmaceutical industry in the delivery of drug information and the regulatory oversight of prescription drug marketing practices. The fellowship gives participants the unique opportunity to experience careers in the areas of government, academia, and industry, thus, qualifying graduates to pursue career opportunities in each respective area. The fellowship is a two-year program consisting of rotations at Purdue University, the FDA, and a pharmaceutical industry company (Janssen Scientific Affairs, LLC, Eli Lilly & Company, or Astellas).

For the 2018-2020 cycle, the drug information track will be recruiting for two positions and the medication safety track will be recruiting for one position.

**Purdue/Takeda Global Regulatory Affairs Fellowship**

The Purdue/Takeda Global Regulatory Affairs Fellowship program will provide a Doctor of Pharmacy (PharmD) graduate with the opportunity to gain specialized, hands-on training and experience in Global Regulatory Affairs. The fellowship is designed to prepare and develop the PharmD graduate for a career in regulatory strategy and drug development. In addition to bolstering a scientific link between Takeda and Purdue University, the fellowship aims to enhance the regulatory strategy activities at Takeda, with a goal to eventually serve and improve the drug development process across industry. The majority of the fellow’s time will be spent at Takeda Pharmaceuticals International Co. in Cambridge, Massachusetts during the two-year fellowship.

For the 2018-2020 cycle, the Global Regulatory Affairs fellowship will be recruiting for one position.
